

FlashGlobal

Scale in Real Time. Grow Without Pause.

Since your reputation rides on hyperscale momentum — growth has to keep pace with expectations.

Hyperscalers don't scale gradually, they scale in real-time, driven by AI, digitalization and technology.

OEM partners must flex just as fast by scaling service parts logistics, service operations, and support across regions without hesitation.

Why Flash?

Flash adapts in real time, flexing service parts logistics to support OEMs as their hyperscaler customers grow.

Through ServiceAxis, OEMs gain an intelligent network that scales seamlessly and keeps service operations agile as hyperscaler innovation advances.

Flash also shifts you from reacting to anticipating.

Our technology identifies early signals, while our teams interpret the data, benchmark performance, and deliver forward-looking guidance.

The result: **earlier interventions, compliance with time sensitive deliveries, and continuous improvement** — so growth never outpaces readiness.

Proof & Key Takeaways

**Real-time scalability
across all service
regions**

**Predictive inventory
positioning to ensure
spare parts readiness**

**98%+ on time delivery performance
— even during rapid expansion**

**Hyperscalers move fast. Flash helps you
move faster — confidently, globally,
and without disruption.**
