

TradeAssure: Your Global Trade Compliance Solution

Expanding your service logistics infrastructure across borders requires a constant pulse on the ever-changing local, regional, and global trade regulations. Failure to maintain awareness of new compliance measures is not an option.

What's at Stake....

**Delayed Shipments
& Missed SLAs**

**Prison
Time**

**Criminal & Civil Penalties
(against individuals & companies)**

**Significant Fines
& Additional Fees**

**Loss of Trading
Privileges**

Reducing Global Trade Compliance Risk

To properly mitigate the risk of noncompliance, you need proactive processes, in-region experts, and the technology to support your service supply chain at a global scale. At Flash, we implement the following risk mitigation techniques into our Importer & Exporter of Record, and Temporary Export services.

Proactive Processes

- An established and accurate Master Parts List, confirming all data points are available creates reliable and compliant trade activities
- An Export Management System determines the need for import and export and in-country transfer license or license exception, specific to your service regions, in addition to the U.S. Export regulations

In-Region Experts

- Trade Compliance and Trade Operations teams ensuring shipments are compliant with all country-specific trade rules and regulations
- Annual compliance training and FCPA certification are required for all our staff members, as well as our partner network

Technology

- Screening against Restricted and Denied Parties lists, and Embargoed Countries
- Validation of licensing authority based on product classification, destination country, and type of end-user
- Systematic creation of all necessary import and export documentation
- Automated EEI filing for exports out of the United States

Importer & Exporter of Record

At Flash, we utilize our people, processes, and technologies outlined above to provide the assurance your operations have the ability to scale across borders. With IOR and EOR services available around the world, fueled by local trade experts, you know you will achieve reliable and predictable outcomes on a consistent basis.

Temporary Export (TempEx)

Reduce new inventory expenses while increasing asset value with the utilization of Temporary Export services. With TempEx, your parts can be temporarily exported for repair, and re-imported into the original country to be restocked, saving you time and money. The best part, **we manage the entire process.**

Managed Services

With our TradeAssure managed services, you can trust your global trade compliance is in expert hands. We provide the tools, knowledge, and support needed to navigate international regulations, reduce risks, and ensure that your service parts logistics remains compliant and efficient.

Some of the Areas We Support Are:

Export License Support

Direct Lane – Direct to FSL Shipments

TradeBridge – Bridging You Into Countries as You Grow

We understand. You're looking to grow service logistics capabilities with a partner who is solely focused on time-sensitive service parts solutions. Our global trade compliance program — a strong combination of processes, technology, and people — works around the clock to provide the assurance that your spare parts move across international borders seamlessly.
